LACTUBE™

LACTUBE™ is the first patented tube-format system with a single-use applicator head.

The product is never exposed to air, never comes into contact with external residues, and remains pristine until the very last application.

Thanks to the thixotropic properties of the formula, product flow is controlled and precise - zero dripping, maximum precision around the cuticle.

The result is a system designed for professionals who work with clients every day: greater perceived hygiene, greater precision, less waste, and less time spent cleaning bottles and brushes.

It is not a new nail polish. It is a new way to apply it.
